DETAILED ACTION

This office action is in response to the Amendment filed 5 July 2007.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steve Timmons on 20 July 2007.

The application has been amended as follows:

Claim 2 has been replaced with the following claim (step (d) added):

A process of manufacturing a blow molded article comprising:

- (a) blow molding a first composition comprising a first polyethylene into a shaped article;
- (b) perceiving parison cuffing defects in said process or said blow molded article;
- (c) providing to said process a second polyethylene having a lower melt index than said first polyethylene, measured according to ASTM D-1238, and having incorporated therein a small amount of a low molecular weight polyethylene glycol; and
- (d) blow molding the composition comprising said second polyethylene into an article.

Claim 10 has been replaced with the following claim (step (d) added):

A process of manufacturing a blow molded article comprising:

- (a) blow molding a first composition comprising a first polyethylene into a shaped article;
- (b) perceiving parison cuffing defects in said process or said blow molded article;
- (c) selecting at least one second polyethylene from HDPE homopolymers having a melt index of from about 0.25 to about 0.80 grams/10 minutes measured according to ASTM D-1238, and having incorporated therein a small amount of a low molecular weight polyethylene glycol and an effective amount of an antioxidant; and
- (d) blow molding the composition comprising said second polyethylene into an article.

Allowable Subject Matter

Claims 2, 10, 13, and 18-37 are allowed.

Art Unit: 1732

The following is an examiner's statement of reasons for allowance: Regarding claims 2, 10, and 18, and all respective dependent claims, the prior art of record neither teaches nor suggests the claimed method for manufacturing a blow molded article including the particular combination of blow molding a first polyethylene composition, analyzing defects in the molding process or article, providing a second polyethylene having a lower melt index than the first polyethylene to the process, in addition to polyethylene glycol, and an antioxidant (claim 18), and then blow molding the new composition.

Regarding Claim 13 and all respective independent claims, the prior art of record neither teaches nor suggests the claimed method of reducing cuffing in the blow molding of a composition comprising HDPE especially blow molding a new composition relative to a composition of HDPE, when the new composition does not contain a fluorocarbon polymer, phosphate, or stearate.

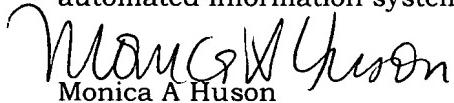

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monica A. Huson whose telephone number is 571-272-1198. The examiner can normally be reached on Monday-Friday 7:00am-4:00pm.
